#### EXPLOITING THE DISABLED.

It is the sentiment of the adminisand of the country that the welware of the disabled soldiers should get the best possible attention. It is realized that aside from those who gave up their lives such veterans are the ones who made the greatest excrifice and are therefore cutified to every conideration from their country.

Thus there cannot fall to be curprise sanifested at the report which been mude by Colonel Forbes, directorthe veterans' bureau, after a tour of inspection to the various points throughout the country where training cents conditions which it is plain were never intended by the government, and when he refers to mushroom establishmemits that are being operated with reterant as employes solely for the purposs of seeing how much such establehments can get out of the government it is evident that his visitation is bound to bring about decidedly differ-

lond Forbes speaks particularly in been followed of placing disabled vetscans in private shops and industrial ents for training. The intent of the government is well enough but those conducting such establishments, resulting in little or nothing in the way of training and virtual slavery for the veterana. Selfish interest is the highest point to which those in charge of such

of taking advantage of every govern-ment undertaking. Whenever governmoney is involved there are those who believe that all they are required of it without making any adequate re-

Large numbers of trees have been in the past few years as memorinis to the soldiers who gave up dwindling game supply, their lives in the World war. The idea When licenses are is an excellent one and from the state- that require them there is of course littion to the effect that a large number hunters in keeping with the game sup-wers to be set out along the Linco'n ply. Provision is made for increasing memorial highway with the same object the game supply by various organizations In mind it can be appreciated that the plan has made a favorable impression effort is made to govern the number of hunters by the number of birds or sni-

While such trees serve as a memorint they also contribute to the improvetrees, and where it becomes necessary to remove any there can be no better its of such game conservation. practice than replacing them with others provided much is feasible.

In the city of Providence encourage-ment is given to the planting of more trees by the city forester who has offered to give the surplus on hand at the municipal reservations to those who apalled for them without charge, the only remirement being that the planting of such trees on the streets is to be done under the ampervision of an expert in

commendable arrangement ought to result in the setting out of immy new-trees. It would be a capital tion for other cities to follow and it would likewise be well if there was adopted such a policy as the setting out of a new tree whenever and wherever one is removed provided there is no reasonable objection to such

multies which plan to put out a stated number of trees each year are guarding against the time when attractive streets will bear little resemblance to themselves through tree movals unless some such plan is fol-

## CENTRAL AMERICAN PEDERATION.

The whole western hemisphere is bound to be interested in the action which has furt been taken by three of the Central American countries in joining hands and forming again a united Central America, with the expectations that the good effect of their action will later on so impress their neighbors that

the two others will join them. There was a time after the throwing off of the Spanish yoke that there was unity in that region. But it remited in five republics which have since continuntil now Guatemala, Honduras and Salvador have been convinced of the wiedom of getting together again, and henceforth they will have a govpatterned after the States with executive, legislative and judiciat branches, with each of the reubites continuing as states and in control of the affairs of each the same as states are in this country, with, each state electing senators and deputies to clerks had stopped the mail robberies the national legislature, while the presthe national legislature, while the pres-ident will be elected by an executive that they had been a bit lax in the ac council popularty chosen. The president

will serve one year and will not be elig-

t will be known should do much for the advancement of the interests of the people in that part of the world. It should have a salutary effect in over-coming neighborhood conflicts and such jealousies as are likely to exist among small republics or nations. Costa Rica and Nicaragua were invited to join the federation and while there is a strong entiment in each for such action the najority has opposed it. There is a belief, however, that that oppositing can be evercome through the accomdishments of the new government and nstead of an unwillingness to join there will be an eagerness to come in, get the mefits and contribute such strength as they are able to. By joining hands here can be little question but what strength will be gained and the interests and alms of each will be greater. this instance self determination

#### VICTIM OF CIRCUMSTANCES.

To judge by the report that comes rom London to the effect that General Pershing will visit England for the purpose of placing the congressional medal of valor of the United States upon the tomb of the unknown British soldier in Westminster abbey, it would appear that there had been some scurry-ing around, as the result of the declaration by the American general that he would return home without a visit to the British isles, and that eleventh hour arrangements had been perfected for the exercises.

works on the basis that in unity there

is strength instead of through division

If we are to judge by the statement from the war department possibly too much has been taken for granted re-garding the English exercises, inasmuch as Secretary Weeks declares that when General Pershing went to France it was the first of November and that he would go to London for a similar purpose at this time if the British government had made the necessary arrangements for the exercises. Likewise it seems that no official notification was given to Len-

Thus while Washington believed that y no stretch of the imagination could be held that there had been an ac of discourtesy on the part of the British overnment in falling to fix a date for the ceremonies that would permit General Pershing to officiate at them, it would appear that England has hasten ed to take steps that would entirely dispel any such thing. Even though, ir view of the statement by the war de partment of this country, it would be mpossible to attach any lack of interst or dilatory practice to London the british are apparently desirous of rewing any possible embarrassment in onnection with the matter by making

Apparently there was no reason ch a date should not have been fixed ng before this, but the explanation by he war department indicates that the roumstances were such that blame anot be attached to London, Thus all's well that ends well.

With the opening of the hunting seaon for various kinds of game those who go into the countryside must of ourse be armed with license as well as is wise to take need of posted land and otection of human beings and domes tle animals.

It is estimated by the department of will get the immediate attention that it agriculture that there will be five mil-deserves. and fields of the country in search of of those who were called on to conduct game of one kind or another and that its affairs. fact it believes emphasizes the need of more adequate and unform laws to stacles to its success were overcome conserve and protect the country's notes regularly circulated unto all parts

When licenses are issued in states ican Forestry associa- its attention paid to restricting the

mals except to restrict the number that can be shot. In order to prevent the extinction of ment in the appearance of the highways big game, where it is claimed that the and sail to the value of property. Per-hupters may far outnumber the animals haps this can be no better appreciated hunted within a given section the dethan by nothing the appearance of partment of agriculture urges limiting streets where trees have died and been the licenses in accord with the number removed in comparison to what it was of game animals which it is believed a few years ago. Some of the most attructive features of streets and grounds is one that has only been advocated but are contributed by the handsome shade it will doubtless draw forth much disission from the hunters as to the merwho would be barred out and how it won'd be done is not indicated.

#### EDITORIAL NOTES. Intoxication bobs up at every corner

ust to show what prohibition isn't do-

With Liberty bonds coming back it is ough to start other things on the road to normalcy.

Sometimes it takes a tree or talehone pole to stop the reckless driving of some motorists.

The man on the corner says: It costs ore to exist in some towns than it locs to live in others.

The world's series should not prevent proper amount of thought being given to fire prevention this week.

Half of those who know how the game is going to come out can be located after the contest is over.

Being told that Kansas has about 50 women (lawyers there are those who will insist that that is what's the mat-

ompare losses on the series but that is omething that can be talked about during the winter. The chief reason why there is so much slate and rock in coal is that
